and Metallurgical Complex  
Superfund Site**

**Part 3 Section 4.0  
Responses to Individual Comments**

United States  
Environmental Protection  
Agency Region 10

August 2012

# Responses to Individual Comments

This section presents EPA's responses to individual comments received on the Proposed Plan. EPA received comments in various forms including letters, emails, and oral testimony at community meetings. The comments and EPA's responses are organized into the following attachments (the attachments are provided in electronic format):

- **Attachment A:** Index of Commenters and Responses
- **Attachment B:** Master Comment List
- **Attachment C:** Responses to Federal Agency Comments
- **Attachment D:** Responses to State Agency Comments
- **Attachment E:** Responses to Native American Tribe Comments
- **Attachment F:** Responses to Local Jurisdiction Comments
- **Attachment G:** Responses to Local Community/Special Interest Organization Comments
- **Attachment H:** Responses to Business Comments
- **Attachment I:** Responses to Individual Comments

Attachment A presents an Index of all comments sorted in two methods. First, all commenters are listed alphabetically by the last name of the person or the organization providing the comments. It provides the locations (Attachment and page number) of the comments and EPA's responses. Second, all comment are listed alphabetically/numerically by the comment number, along with the locations of the comments and responses.

Many comments address similar issues. In these cases, the response for a given issue is provided once. Responses to later comments on the same issue refer to the master comment list where this response is provided. These responses are referred to as "master comment responses" and are found in Attachment B. When using Attachment B, the user may find that the referenced response addresses more issues than he or she raised. In these cases, it is expected that the user will be able to identify those parts of the referenced response that apply. In other cases, a comment may raise multiple issues. In such cases, the user may be referred to several master comment responses for a complete response to all issues raised. An overview of the issues raised and EPA's responses is provided in Part 3, Section 3.0, Responsiveness Summary.

In Attachments C through I, the comments and responses are sorted alphabetically by the last name of the commenter. Each comment letter, email, and oral testimony comment was assigned a unique identification number (e.g., 1365213). Each comment was assigned a unique comment number (e.g., LJ36-1). Many commenters submitted more than one comment letter. In these cases, a separate identification number and comment number were assigned for each set of comments. This approach helped EPA ensure that all comments were addressed.

In Attachments C through I, an image of the original comment is shown on the left side of the page and includes EPA's delineation. The right side of the page presents EPA's response to that comment.

A number of commenters' names were illegible, and these commenters are listed as "Unknown." EPA has included their comments in Attachment I and has responded to the comments where possible.

As provided in the CERCLA statute, Section 117(b), EPA is only responsible for providing responses to each of the "significant" comments, criticisms, and new data. Comments not meeting this statutory criterion have nonetheless been recorded in this section, and responses have been provided to the extent possible.
